October Meeting

October 6, 2009

The next meeting of the Rock River Aero Modelers will be held on Tuesday, October 6th. The meeting will come to order at 7:00PM. The meeting will be held indoors at the Turtle Town Hall.

Upcoming Events

October Events

After a quick look at the local area club websites, there are no events to report for the month.

Everybody must be feeling the 'chilly winds of winter' around the corner.

Items of Interest

Here's some photos from our club Fun-Fly back in August

That's not good.

There's a story here...I'm sure.

I think Tom's got this whole electrical thing figured out. Now if he can just get that battery that battery to fit in the plane.

Quick....somebody get the bug spray!

The Koshkonong Float Fly is now history. An enjoyable day, good flying conditions and a good time by all.

“I don’t care what you say....something just don’t look right!”

I understand Tony has been training to become a plumber.

Some people just can’t get the hang of taking-off on water.

Tom Steven's looking dapper as always.

That is one nice lookin' plane!

Correction

In the last newsletter, I incorrectly credited Andy Brookhiser for the videos on our website. Allison informed me that it was not her Dad, so I presume it must have been Andrew Kronquist. Nice job.
